

TRUCKWASH

This non-caustic, solventless degreasing detergent is biodegradable and contains powerful high-foam surface-active agents and emulsifiers for the rapid removal of all types of dirt and grime from all types of surface. It is a highly efficient streak free cleaner being a blended composition of surfactants and wetting agents which will emulsify dirt and hold it in suspension.

The versatility of this product will meet all cleaning and maintenance requirements on all hard surfaces in domestic, commercial and industry applications.

Truck Wash will not harm paintwork and has a high dilution rate making it very economical to use. It further displays the following properties:

- Neutral Alkalinity
- Excellent Hard Water Compatibility
- Excellent Salt Water Compatibility
- High Quick-Break Foam
- Complete Biodegradability
- Odourless Blue Viscous Liquid
- Non Hazardous Classification

DIRECTIONS

First hose all loose dirt and mud from vehicle or surface to be cleaned. Generally, for cleaning manually or by pressure washers, foam guns, steam cleaners, automatic scrubbers or car wash systems, use 5-10 mls Truck Wash per litre of water.

The following dilution rate may be used as a guide.

Heavy Cleaning	- 1 to 80 parts water
Degreasing	- 1 to 6 parts water
Medium Cleaning	- 1 to 100 parts water
Light Cleaning	- 1 to 150 parts water
Pressure Cleaning	- 1 to 5 parts water and then add to cleaner

TYPICAL CHARACTERISTICS

Properties	Value
Appearance	Blue opaque liquid
Solids Content	> 10%
Density @ 25 °C	1.00
Water Miscible	Completely
pH	7.0 – 8.0
Hazardous Classification	Non Hazardous
Foaming Level	High
